

FIELD DATA GATHERING (FDG)

Improve autonomy and enhance field flexibility even greater.

Spend more time acting, less time collecting data.

W Energy FDG is your single-source mobile data capture solution that streamlines data collection, automates workflows, and harmonizes enterprise-wide collaboration to help Lease Operators and production staff capture and digitize “everything critical” to keep work sites running as efficiently as possible.

“

With W Energy it’s like adding 15 pairs of additional hands to a 100-LO team. Lease operators and field crew, reclaim 1-2 hours in your daily schedule and concentrate on what matters most with the ability to self-configure and automate workflows in real-time with mobile data capturing.

Lease Operators gain back 1-2 hours in your schedules daily.

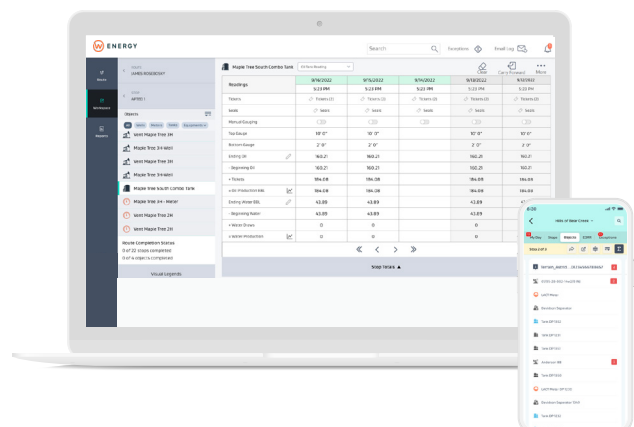

W Energy FDG Competitive Features:

Capture anything in the field – production data, regulatory and compliance data

Capture and scan data and images directly from Run tickets & LACT tickets

Real-time data connectivity with backend system & work offline when you need it

Available on both iOS and Android

Cashflow Transformed. Speed Delivered.

“Maintain data accuracy and simplify daily task load with the click of a button.”

Industry-leading capabilities:

Field data capture made easy, with an intuitive and modern user experience that is built with a field-first approach

Integrate natively with SCADA systems, key production accounting, forecasting and ERP systems

Lease Operators can configure each site in an order that reflects the reality on the ground. This translates to fewer errors and less time spent collecting data

Data validation eliminates most errors before the data is even submitted. The result- Operators spend less time to capture more accurate data.

Customer Outcomes

W Energy saved us

90 minutes of data capture time per day per Lease Operator

after conducting a side-by-side experiment to their existing data capture system.

Leading E&P Operator in Permian Basin

Business Value-Added Benefits include:

Save 90-120 minutes of data capture time per day per Lease Operator.

Limit the number of data applications you use overall to just one data capture tool .
