W ENERGY

FIELD SERVICE MANAGEMENT (FSM)

Your one-stop shop for critical task management within a single go.

Take out the guesswork for your field operations teams and safeguard your production base.

Optimized by the cloud, W Energy's Field Service Management solution digitizes traceability of your field resources and vendors, and does away with time-consuming tedious field task prioritization processes, improving your overall productivity and accelerating your pathway to accurate compliance.

> **"**
>
> With W Energy FSM, field leaders self-configure task workflow, track responses to completion, and capture all associated data, including vendor and cost, in one place.

Prioritize when and where you are most needed.

W Energy FSM Competitive Features:

Uber-style task and workorder broadcasting
....

Grid and Gantt planning views for foremen, planners and dispatchers
....

Just-in-time dispatching for employees and vendors
....

Break-ins and critical work order handling

Stay ready and optimize your efficiency against rapidly changing priorities with the industry's most robust digital field service management solution.

World-class capabilities:

Leverage our intuitive mobile app to gather data, execute tasks, collaborate across teams, and collect geo-fenced data.

Schedule and dispatch complex jobs optimized for many factors such as resource skill, availability, location, task priority, and more.

Redefine optimal task and vendor performance with integrated analytics, tasks, SCADA alarms, inventory and production data.

Integrate critical source systems – EAM, SCADA, GIS and more - into one single pane of glass.

Customer
Outcomes

We saw an increase in contract labor documentation by
