

PRODUCTION ACCOUNTING

Upgrade to
lightning-fast
allocations intelligence
without compromising
your month-end.

Speed up your daily and monthly allocations and reduce month-end close from ten business days to two.

W Energy Production Accounting is an integrated accounting software solution built to harness speed, maximize flexibility, and empower autonomy to ensure you meet on-time compliance.

“

Minimizing unplanned deferment is a journey that requires a production software committed to the same things you are - field autonomy, distributed accountability, and data accuracy.

Achieve greater business resiliency

Digitally transform your operations enterprise from the field to the back office and everywhere in between.

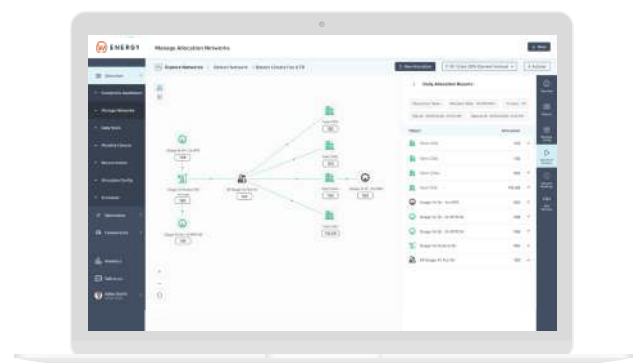

Production Accountings Competitive Features

Monthly Allocations with configurable methodologies, products & dispositions

Empower your field personnel with real-time allocations and data sharing triggered daily from the W Energy mobile app

Drag & Drop network creation & Bulk upload options available from the easy to use User Interface

Intuitive Exceptions dashboards to easily troubleshoot your data

Maintain rigid control while gaining operational flexibility

“Managing month-end has never been easier.”

Our fully integrated cloud-based production accounting software eliminates manual actions, quickly processes financial transactions, and seamlessly automates compliance reporting as your single tool of truth.

World-class capabilities:

Allocations networks management made easy, with an intuitive and modern user experience.

Triggered daily allocations can keep your reports and field users apprised of allocated volumes at the well level in an instant. Ensuring they can analyze, prioritize and eliminate deferred production.

Clear & concise exceptions from allocations run in a single real-time dashboard. Allowing you to fix allocation data today. Don't wait hours to generate exception reports.

Data integration available across your spectrum of software sources and may include SCADA.

Customer Outcomes

Reduced allocation process from **8 days to a few hours** with greater accountability at the 'well-level'

Reduced monthly close from **10 to 2 business days**

Leading E&P Operator in Eagle Ford Shale

Business Value-Added Benefits include:

Sync operational tasks and data in real-time with offline support, and quality checks for reliable production insights.

Combine tasks, data, forms, and personnel across departments, ensuring high business process continuity and end to end success with configurable workflows.

Do not let the review of exception reports take hours. You can fix allocations instantaneously with clear and concise real-time allocation exceptions displayed in a single dashboard.

Data integrations available for your external software tools, like SCADA, GIS & EAM.
