PLANT ACCOUNTING

Empowering Midstream Companies with Transparent, Fast, and Intuitive Accounting

Modernize your operations with a cloud-based solution designed for today's midstream energy challenges.

W Energy's Plant Accounting solution combines transparency, speed, and flexibility to streamline complex accounting processes, strengthen decision-making, and eliminate inefficiencies.

Why choose W Energy Plant Accounting?

Transparent calculation insights

Gain clear insights and make confident financial decisions with CalcTrace™.

Trace every calculation

Seamlessly visualize and audit each step, from measured volumes through to final settlement values.

Build trust with partners

Understand the 'why' behind the numbers, improving both collaboration and compliance.

Empower decision-making

Gain insights into allocations and operational patterns without guesswork.

Rapid, high-performance operations

Maximize efficiency and save valuable time with our high-performance solution.

Close month-ends faster

Complete month-end processes quickly and efficiently, empowering your team to focus on strategic priorities.

Fast analysis

Run thousands of meters or complex calculations without delays, so you can focus on strategic decisions.

A user experience that works for you

Accounting doesn't have to be clunky or difficult.

Intuitive UI

Modern, clean, and easy to navigate interface which minimizes the learning curve.

Fewer barriers, faster insights

Designed for every user, from analysts to leadership, to access data effortlessly.

Access securely from anywhere

Cloud-enabled capabilities ensure your team can securely access financial insights from any location or device—whether in the office, on the road, or at home.

Empower decision-making with DataView™

W Energy's DataView gives your team the ability to analyze data their way—no technical expertise required. With intuitive connections and user-friendly descriptions, users can easily build custom reports or dashboards in Power BI or other business intelligence tools.

Intuitive and user-friendly

Designed to simplify the reporting process so teams can focus on insights rather than navigating complex systems.

Build custom dashboards

Quickly generate visual insights to monitor trends, track performance, and support strategic planning— all on-demand.

Clear and accessible data insights

Data is presented with straightforward descriptions that make it easy for all users to interpret and analyze without advanced training.
